

Aircraft Component Technician

Company Profile

Aeropol Aviation Services Corp. (AAS) is a leading Canadian provider of quality driven aircraft component maintenance, repair, and overhaul (MRO) solutions to meet the most demanding standards of the aerospace industry.

We are a one-stop shop specializing in Hydraulic, Pneumatic, Fuel System, Mechanical, Electrical and Landing Gear component MRO services, Component Distribution, in-house and on-site NDT, in-house Welding solutions for commercial and military aircraft. Our rapid growth means that we are constantly seeking skilled and talented individuals to be part of our growing team. An employment opportunity at AAS now exists for an Aircraft Component Technician.

Job Description

As an Aircraft Component Technician, you will perform disassembly, cleaning, inspection, assembly, and testing of various aircraft components. In this role you will utilize hand tools and precision measuring instruments. Requirements include carrying out all maintenance tasks in accordance with Component Maintenance Manual (CMM), service bulletins (SB) and Airworthiness Directives (AD) specifications. As part of this role, you will be responsible for recording all tasks pertaining to work orders and carrying out all procedures to meet quality control requirements.

Desired Skills

- ▶ 3+ years experience in aircraft component maintenance or related field
- ▶ Strong assembly, tear down, inspection and test equipment experience
- ▶ Ability to follow and interpret technical drawings and instructions
- ▶ Ability to function as part of a high-performance team
- ▶ Ability to read, write and speak English

Company Benefits

Group plan with life insurance, critical insurance, dental and extended health care coverage available after 90 days from the date of employment. Summer hours, company sponsored flying club, summer picnic, holiday lunches.
